Dear Dr ERIC

Re: Referral for patient reference ESX0000273

Thank you for referring this patient through the NHS Essex referral management system. Your referral has been viewed by one of our clinical triagers who has determined that the referral does not meet the acceptance criteria for the following reason:

The complexity of this referral is deemed to be Level 1, within the scope of general dental practice.

The referral is therefore being returned to you. You should make arrangements for the treatment to be carried out either by yourself or another member of your practice team. Should you wish to appeal against this decision, or believe that there are additional clinical reasons that should be considered by the triage team please resubmit the referral – either online simply by editing the referral or submit a new paper copy – stating your reasons clearly. If there is no clinician able to undertake the treatment indicated please attach a covering letter to the referral (or add additional information to your online referral) explaining the reasons why. It is expected that contract holders make arrangements for Level 1 cases to be seen in primary care.

You can find out more about the oral surgery pathway, levels of complexity and referral acceptance criteria on the website or the reverse of the printed referral forms. The website always has the most up to date information available.

Yours sincerely

Essex Referral Management Team
