Dear Dr ERIC

Re: Rejected referral attached ESX0000273

Please find enclosed a referral that has been rejected by the clinical triage team. The reason for the rejection is:

We require radiographs as per the referral guidelines. If you are using online submission please upload any digital radiographs using the export function from your software or disc and re-refer. If you are referring by post or using OPG films please supply an appropriate radiograph and re-refer. Please ensure the radiograph is correctly labelled and re-submitted with the referral form and all it's attachments (Please do not staple). We will return your radiograph films to you.

NEED PA VIEW OF THE CANINE

If you wish to re-refer this patient please **simply resubmit this form** with the appropriate additional information. If you believe that this referral is within the guidelines or believe that an exception should be made please attach additional details to justify this. ***If you are unable to provide radiographs please explain why.***

If you wish to discuss the rejection of this referral please contact the dental commissioning team at your local area team. A copy of all rejected referrals are automatically sent to the team.

Copies of guidance notes for the specialties are available on the website as are examples of completed forms.

Thank you.

Kindest regards

Dental Referrals
